PROFESSIONAL SUMMARY

Machine Learning & Data Engineering student with previous software engineering experience and strong interest in AI-powered analytics, scalable data systems, and intelligent backend architectures. Experienced in Python, SQL, machine learning workflows, and real-world data preprocessing. Currently developing a thesis focused on real-time semantic data transformation and LLM-based decision-making systems.

WORK EXPERIENCE

Software Engineer — LinkTech IT

Dhaka, Bangladesh | Feb 2019 – Mar 2021

- Designed and maintained relational database structures for enterprise software systems
- Processed and validated operational data across HRMS, CRM, and accounting platforms
- Collaborated with development teams to improve backend workflows and data consistency
- Performed testing and quality assurance for application data and workflows

PROJECTS

Road Hazard Data Analysis & Prediction System

Python, Pandas, Scikit-learn, XGBoost, Streamlit

- Processed and transformed real-world vehicle sensor datasets
- Developed machine learning models for hazard prediction and anomaly detection
- Applied temporal feature engineering and clustering techniques
- Built interactive dashboards and visualizations for analytical insight generation

Bachelor Thesis (Ongoing)

A Unified Architecture for Real-Time Semantic Data Transformation and LLM-Based Decision-Making

- Designing FastAPI-based backend architecture for real-time semantic data processing
- Exploring LLM-integrated transformation and decision-making workflows
- Developing scalable AI-driven backend architecture

EDUCATION

Lapland University of Applied Sciences — Finland

Bachelor of Engineering, Machine Learning & Data Engineering | Expected Dec 2026 | GPA: 4.3/5

Bangladesh University of Business & Technology — Bangladesh

Bachelor of Science, Computer Science & Engineering | 2019 | CGPA: 3.52/4

ACADEMIC HIGHLIGHTS

- ACM ICPC Dhaka Regional Final (2017)
- 3-time Champion in a row in BUBT IUPC
- Participated 5+ National Level Programming contest
- Solved 500+ Problems in Codeforces, Uva, Uri, Spoj, LightOj, etc.

TECHNICAL SKILLS

Programming & Databases:

- Python
- SQL
- MySQL
- C/C++

Data Engineering:

- ETL Workflows
- Data Preprocessing
- Data Transformation
- Relational Databases

Machine Learning:

- Scikit-learn
- XGBoost
- Random Forest
- Clustering
- Anomaly Detection

Backend & Tools:

- FastAPI
- Streamlit
- Git
- GitHub
- Linux

Visualization:

- Plotly
- Dashboards
- Data Exploration

Currently Learning:

- PySpark
- Databricks
- Azure
- Docker

LANGUAGES

- English (Professional)
- Bengali (Native)
