PROFESSIONAL SUMMARY

Machine Learning & Data Engineering student with previous software engineering experience and strong interest in scalable data systems, cloud-based analytics, and machine learning workflows. Experienced in Python, SQL, ETL processes, data transformation, and backend development. Currently developing a thesis focused on real-time data transformation and intelligent decision-support systems. Passionate about building reliable, data-driven solutions using software engineering best practices.

WORK EXPERIENCE

Software Engineer — LinkTech IT

Dhaka, Bangladesh | Feb 2019 – Mar 2021

- Designed and maintained relational database schemas for enterprise software systems
- Processed, validated, and transformed operational data across HRMS, CRM, and accounting platforms
- Collaborated with development teams to improve backend workflows and data consistency
- Performed testing, validation, and quality assurance for application data and business workflows

PROJECTS

Road Hazard Data Analysis & Prediction System

Python, Pandas, Scikit-learn, XGBoost, Streamlit

- Processed and transformed real-world vehicle sensor datasets
- Developed machine learning models for hazard prediction and anomaly detection
- Applied temporal feature engineering and clustering techniques
- Built interactive dashboards and visualizations for analytical insight generation

Bachelor Thesis (Ongoing)

A Unified Architecture for Real-Time Semantic Data Transformation and LLM-Based Decision-Making

- Designing scalable data transformation pipelines using FastAPI and LLM technologies
- Developing backend services for automated data processing and decision support
- Applying software engineering principles to build reliable and maintainable data systems

EDUCATION

Lapland University of Applied Sciences — Finland

Bachelor of Engineering, Machine Learning & Data Engineering | Expected Sept 2026 | GPA: 4.3/5

Bangladesh University of Business & Technology — Bangladesh

Bachelor of Science, Computer Science & Engineering | 2019 | CGPA: 3.52/4

ACADEMIC HIGHLIGHTS

- ACM ICPC Dhaka Regional Final (2017)
- 3-time Champion in a row in BUBT IUPC

TECHNICAL SKILLS

Programming & Databases:

- Python
- SQL
- MySQL
- C/C++

Data Engineering:

- ETL Pipelines
- Data Validation
- Data Transformation
- Relational Databases

Machine Learning:

- Scikit-learn
- XGBoost
- Random Forest
- Clustering
- Anomaly Detection

Backend & Tools:

- FastAPI
- Streamlit
- Git
- GitHub
- Linux

Visualization:

- Plotly
- Dashboards
- Data Exploration

Cloud & Platforms:

- Azure Fundamentals
- Snowflake (Learning)
- Databricks (Learning)
- PySpark (Learning)
- Docker (Learning)

LANGUAGES

- English (Professional)
- Bengali (Native)
