

MOHAMMAD AZIJUL HAKIM

SUMMARY

Data-focused engineering student with hands-on experience analyzing real-world datasets, building predictive models, and extracting meaningful insights from structured data. Experienced in data preprocessing, anomaly detection, and visualization. Strong interest in applying data analytics to real-world problems and supporting data-driven decision-making and dashboard development.

EDUCATION

Bachelor's Degree, Machine Learning & Data Engineering

Expected in 12/2026

Lapland University of Applied Sciences - Rovaniemi, Finland

GPA-4.3* out of 5

Bachelor of Science, Computer Science & Engineering 01/2019

Bangladesh University of Business & Technology - Dhaka, Bangladesh

GPA: 3.52 out of 4

PROJECTS

Road Hazard Data Analysis & Prediction System:

Tech: Python, Pandas, Scikit-learn, XGBoost, Streamlit

- Analyzed real-world vehicle sensor data collected over long periods
- Merged multiple raw datasets to build a structured master dataset
- Performed anomaly detection to identify unusual driving and environmental patterns
- Developed hazard prediction models using Random Forest and XGBoost
- Designed time-window-based feature extraction for temporal analysis
- Applied K-Means clustering to identify patterns and label data segments
- Built visualizations and dashboards to explore hazard trends and events
- Interpreted results to identify patterns and support data-driven conclusions

Machine Learning & Data Analysis Projects:

- Built classification and prediction models using structured datasets
- Performed data preprocessing, feature engineering, and evaluation
- Used Python libraries such as Pandas and Scikit-learn

RELEVANT COURSEWORK

- Numerical Analysis
- Probability & Statistics
- Introduction to Data Analytics
- Data Mining
- Pattern Recognition
- Machine Learning
- Sensors and Data Acquisition
- Database Systems
- Research Methods

LANGUAGES

- English, Full Professional Proficiency
- Bengali, Mother Tongue

CONTACT

Address: Rovaniemi, Finland

Phone: 0405657863

Email: toufiksiam7@gmail.com

LinkedIn:

<https://www.linkedin.com/in/mohammad-azijul-hakim-813727193/>

Portfolio: <https://ahakim7.github.io/portfolio/>

Github: <https://github.com/ahakim7>

SKILLS

Data Analysis & Tools:

- Python (Pandas, NumPy)
- Data cleaning & preprocessing
- Exploratory Data Analysis (EDA)
- Data visualization (Plotly, Streamlit)

Machine Learning:

- Classification and prediction models
- Random Forest, XGBoost
- Feature engineering
- Anomaly detection

Other:

- SQL (MySQL)
- Git & version control

WORK EXPERIENCE

Software Engineer

LinkTech IT, Dhaka, Bangladesh

Feb 2019 – Mar 2021

- Analyzed business requirements and translated them into structured data models
- Designed and managed relational databases (MySQL) for multiple systems
- Processed and structured application data to ensure consistency and usability
- Performed data validation, testing, and quality assurance
- Worked with large datasets from systems such as HRMS, CRM, and accounting platforms
- Collaborated with teams to optimize system performance and data workflows
